

Quality Care. Sustainable Practices.

Choose sustainability—
without compromising quality.

At Masimo, we remain committed to both excellent patient care and environmental responsibility—and continually strive to enhance the sustainability of our business practices.

Product and Packaging

We practice sustainability by designing products with the environment in mind. Examples include:

- Lightweight single-patient-use RD pulse oximetry sensor design while maintaining best-in-class 1.5% A_{RMS} SpO₂ accuracy specifications*
- Zero waste to landfill through recycling sensors
- Durable and upgradable instrument designs
- Maximised sensor life and reduced cost through the use of replacement tapes at the bedside¹
- Sleek packaging optimised to reduce paper and materials

Our Facilities

Sustainability does not end with our products. We also prioritise green initiatives at each of our facilities:

- Generating ~1 million kilowatts of energy via solar power annually²
- Cool roof coating to limit facility heating and cooling needs
- Paper recycling
- WaterStar certification[†]
- Electric vehicle charging stations

¹Palmer A et al. *Biomed Instrum Technol.* 2021;55(2):59-62.

²Internal data on file for 2021.

³Internal data on file since launch of RD sensors in 2016 through 2022.

*ARMS accuracy is a statistical calculation of the difference between device measurements and reference measurements. Approximately two-thirds of the device measurements fell within \pm ARMS of the reference measurements in a controlled study.

[†] Internal data on file for 2023.

For professional use. See instructions for use for full prescribing information, including indications, contraindications, warnings, and precautions.

Go green with us.

Reduce the risk of cross-contamination with single-patient-use RD sensors, while prioritising sustainability.

All single-patient-use Masimo RD pulse oximetry sensors are designed for comfort, accuracy, and sustainability—and we continue to strive for better. Results include:³

1,800

METRIC TONS OF
MATERIAL ELIMINATED

9,000

TREES SAVED BY USING
ELECTRONIC MANUALS

17,500 m³

OF WATER SAVED BY
ELIMINATING THE USE OF
PAPER MANUALS

130,000 m³

OF CARDBOARD SAVED
WITH SMALLER PACKAGING
